

Know How! AG - Company

Know How! AG, an independent owner-managed company, has been continuously developing new training concepts and e-learning solutions since 1992. In 1995, we created the first successful e-learning products as a pioneer in the field of web-based-training (WBT), based on our experience as a seminar provider.

Know How! AG offers concepts and solutions well-suited for software migration projects as well as employee development to customers from all industries. High-end custom e-learning, courseware and practice oriented seminars together with expert consulting are among our core competencies.

Our focus is always set on and shaped around people, as it is the ever-growing know-how of the employees which increases a company's long-term success and sustainability.

Based in Germany, our customers appreciate our professional services for the German market as well as for their international subsidiaries.

Know How! will effectively advance you and your employees to the level you require.
